Staving off old age!

Battery old age can't be prevented but it can be postponed.

You can keep your starter from getting rheumatic in its youth—your lamp from getting dim and your spark from losing its kick—by just a little care.

If you're in doubt about just what care is needed, you ought to drive around and ask us. It's our business to know.

There's another thing you ought to ask about—Threaded Rubber Insulation. It's the most important storage battery improvement in years.
